FOR SEBI-REGISTERED STOCK BROKERS

Your IPO desk, under your brand.

Mainboard and SME IPOs, end to end, under your own brand. Or inside the app you already have. Your clients stay with you, and the engineering is already done.

1,260+	NSE + BSE	Zero	Your book
IPOs covered	Both exchange rails	Engineering needed	And nobody else's

Safal Capital Services Private Limited

v3.0 · October 2026 · newipo.finwave.co

01 Why brokers partner with us

Keep clients in your app

In IPO week your clients open other apps. Give them a full IPO desk under your own name.

Go live without a build

Send us your logo, your colours and a subdomain. We host and run the rest.

A back office, not just a website

Reports on your own book, registrar files matched by PAN, CSV export by day, month and IPO.

Compliance is built in

The platform enforces SEBI bid limits, the one-PAN rule and ICDR offer checks.

02 What your clients get

IPO list and key dates

Open, upcoming and listed issues. Price band, lot size, issue size, and reminders before an issue closes.

Lot ladder and minimum bid

Minimum bid for each category, with lot ranges and amounts, from the issue's own reservation table.

Allotment check on any PAN

Registrar files matched to applications automatically, with the registrar's own rejection reason.

Listing performance

Listing-day gain or loss on past issues. Past record only, not a forecast.

Documents and financials

RHP and DRHP, four-year financials, objects of the issue, promoters and the anchor book.

Responsive website

One site for desktop and mobile, carrying your brand throughout. It also installs like an app.

03 Three ways to work with us

01

WHITE-LABEL

Your brand, end to end

Your logo, your colours, your own domain. We host and run it. Nothing for your team to build.

02

API

Keep your own app

Call our API from your own app. Full documentation with a live tester you can run before you write code.

03

HYBRID

Start on ours, move to yours

Run on the hosted site while you build. Switch later without re-onboarding a single client.

04 How your clients apply

UPI and syndicate ASBA

Retail, HNI and reserved-quota tabs, with cut-off bidding and one itemised consent. Your client sees the exchange's own UPI status.

Print forms

Prefilled ASBA forms from the real SEBI template, ready to print and hand to the client.

The whole family in one go

A client and their family together, each with their own PAN, demat and UPI, as the rules require.

More than one demat

A PAN may hold several demat accounts. Your client picks which one gets the allotment.

Modify a live bid

Change a wrong UPI ID after submission. It updates every live bid that client is holding.

Unblock stuck funds

If money stays blocked after allotment, raise an unblock request with the issue's sponsor banks.

05 What we need from you

REGISTRATION

- SEBI registration number, with a copy of the certificate
- ARN, if you distribute mutual funds too

THE ENTITY

- Legal name and entity type
- Business PAN and GSTIN
- Registered city and state

PEOPLE

- A contact person, email and mobile — this becomes your admin login
- An authorised signatory
- A compliance contact

FOR A WHITE-LABEL

- Your logo and brand colour
- The subdomain you want, and DNS access

FOR THE API

- A technical contact
- The server addresses your calls come from

06 SEBI rules, built into the product

One PAN, one application

One per PAN per issue, plus one per reserved quota. Matched on the encrypted PAN, never on a name.

Money blocked, not debited

ASBA with a UPI mandate. Funds stay in your client's own bank until shares are allotted.

Bid limits enforced

Retail up to ₹2 lakh. S-HNI ₹2–10 lakh. B-HNI above ₹10 lakh. SME needs two lots minimum.

Form chosen automatically

UPI mandate up to ₹5 lakh. Above that, the application moves to a syndicate ASBA form.

ICDR offer structure checked

QIB, NII and Retail limits, the NII split and the 60% anchor cap. A wrong figure is flagged or blocked.

T+3 listing dates

Checked on the real NSE trading calendar with exchange holidays, not just weekdays.

No advice, anywhere

No buy or sell calls, no ratings, no target prices. We distribute and inform only.

Your book only

Your reports cover your own clients only. No other applicant's data, and no other broker's.

Client data protected

PAN and bank details encrypted, and masked in reports. Consent taken at apply time, item by item.

These are rules the platform enforces. What your own registration allows you to publish stays your compliance team's call. Tell us what they decide and we will configure it and lock it.

Ready when you are.

Tell us which model suits you and what your compliance team needs to see. Approval takes a couple of working days, and we configure your brand, your domain and your settings before a single client sees it.

investoyard

Investoyard is an IPO information and application platform operated by Safal Capital Services Private Limited. We distribute and inform, and give no investment advice or recommendation. Investments in securities carry market risk — read all offer documents carefully. This document describes platform capability. It is not an offer, and not a regulatory clearance for any figure a partner chooses to publish.
